

Continuing Airworthiness and Maintenance Management Services (CAMO)

Introduction

Good airworthiness management is crucial to any operator or aircraft owner in order to maintain safe and efficient operation of its fleet. Well-managed, timely maintenance and parts replacement is key to keeping aircraft running costs low and safety standards high.

Fokker Services now introduces its CAMO service. This service offers operators and aircraft owners customized Continued Airworthiness Management Organisation support to ensure fleet airworthiness according to EASA standards. We deliver a high quality, cost effective and independent solution for both the Regional and Corporate markets.

The CAMO service is a collaboration between Fokker Services and airworthiness and safety management specialist [AVISA](#) Ltd. This combination provides in depth Type Certificate know-how with the specialist EASA Part-M regulatory knowledge and CAMO infrastructure of [AVISA](#).

Your needs

With the increased global adoption of EASA part M regulation, operators and owners are required to have an approved organization to manage the airworthiness of their fleet.

For start-up airlines, airlines with a limited fleet or airlines that wish to manage part of their fleet outside their standard systems, this can be a complex, time consuming and uneconomic process.

Using cutting edge Rusada Enterprise software, supplying highly experienced personnel and Type Certificate know how, our CAMO service provides operators and owners with a service that manages maintenance requirements to the most detailed level. In turn, this detail enables visibility and flexibility throughout the entire maintenance planning process.

Clients receive tailored services that take into account local regulatory requirements, the operational environment and each client's own business expectations.

Our service is fully approved by EASA and many other regulatory bodies to the Part M standard.

Your benefits

Fokker Services provides with its CAMO services access to cost effective highly skilled engineering department and infrastructure at a fixed fee.

Our service takes care of both by securing records integrity whilst also easily demonstrating the right levels of compliance. This maintains the asset value when returning the aircraft from lease, no matter where or by whom it has been operated.

By choosing Fokker Services as your CAMO provider you will get:

- EASA approved airworthiness Management
- A customized maintenance program using type certificate know-how
- Web based Rusada Maintenance Management Software

In today's industry climate a cost effective and independent CAMO service can provide exactly what is needed to keep your fleet airworthy, reliable and flexible.

Combining the type certificate know-how of Fokker Services and the infrastructure from [AVISA](#) gives you the right combination for a reliable fleet.
