

Product Engineer – Avionics & Instruments

The Role

The role of Product Engineer – Avionics & Instruments is pivotal for the Component Maintenance activities within Fokker Services. As such, you will be developing new capabilities, technologies and repair procedures for the Avionics & Instruments shop, as well as maintaining existing capabilities and providing engineering assistance.

You will have the opportunity to work with an experienced team of fellow product engineers, certification engineers & product owners and you will be responsible for Design, Development and Introduction of new repair solutions.

The Product Engineer – Avionics & Instruments will report to the Capability Development Lead and will liaise with fellow Product Engineers, the Component Repair Shop and Product Owner in order to achieve goals and objectives.

Key Responsibilities

- Responsible for development of new avionics capabilities and repair technologies
- Responsible for execution of continuous improvement on the existing capability portfolio by means of lean principles
- Support potential new business requests from the Product Owner in order to optimize or expand the scope of Avionics capabilities
- Support Avionics shop in continuously improving the reliability of the relevant products
- Responsible for initiating and identifying cost saving activities to enhance the financial performance of the Avionics shop
- Supports Product Owner by means of technical data analysis on performed work and set-up of technical measurements to improve business intelligence on a product level
- Responsible for maintaining the existing capability portfolio from a technical perspective

Experience & Qualifications

Essential:

- A demonstrated understanding of electrical components and avionics systems
- A demonstrated ability to identify improvements, applying lean principles and driving continuous improvement
- Demonstrated commercial savviness and understanding of operational excellence
- Demonstrated ability in solving complex problems and showing a can-do attitude
- Demonstrated excellent analytical and data analysis skills
- A demonstrated proficiency in relevant software skills: MS Excel and Access

Desirable:

- BSc degree, or equivalent, in an (Electrical) Engineering discipline
- Experience in Python, C++ or other programming languages

What We Offer

The CLA (CAO) Metalektro applies. This consists of the following:

- A competitive salary;
- 27-29 holiday days and 13 ADV leave days per year, based on a fulltime (40 hours) contract;
- Room for professional and personal growth and a lot of autonomy;
- This role will be based out of our office in Oude Meer (Schiphol) and full time presence at this location is expected.

About Fokker Services Group

At Fokker Services Group, our greatest purpose is to exceed reliability expectations, keeping customer aircraft where they belong - in the sky!

An aftermarket integrator with design, production, maintenance, and airworthiness expertise and experience, on which commercial and defense operators around the world rely for the continued competitive operation of their fleet. Unique independent competence for comprehensive single source solutions with a global presence, with facilities in Europe, Asia, and the Americas. The Fokker Services Group has a profitable revenue of Euro 250M and employs around 1000 people,

Our Values

As a High-Performance Organization, our core values shine through in everything we do:

Customer Focus

We meet and exceed our customers' expectations by offering unique and personalized solutions. Creating clear expectations and building a sustainable relationship based on quality, safety and trust is what we value most.

Innovative Thinking

Our success is based upon an innovative mindset. We identify and create new opportunities, products, and customer solutions by being brave, daring to lead and making decisions. With our entrepreneurial and growth mindset, we explore and learn ways of doing things differently every single day.

Global Excellence

We strive for quality, reliability, and excellence. Together we create a high-performance culture in which digital transformation, continuous learning and improvement is key. Sharing knowledge and working cross functionally helps us to inspire and achieve our shared goal; to exceed expectations and keep aircrafts where they belong; in the sky!

**We Care**

Our people are at the heart of our organization. Only when we work together can we create an inclusive and respectful work environment in which we motivate, support, and inspire each other. We make a difference by being open, honest, respectful, and empathetic towards each other. Safety, quality, and trust are paramount.
