

## Quality Engineer

### About Fokker Services

At Fokker Services, our drive revolves around one purpose: exceed reliability expectations to keep your aircraft where they belong, in the sky. As a Global Independent Aerospace Service Provider we create tailored solutions for your maintenance of regional, commercial and military aircraft. We engineer, repair, upgrade, and deliver high-quality solutions, innovating in multiple areas to facilitate and support your competitive operations. Our services range from type certificate holder-related product support services to flight hour based component availability and repair programs, spare parts, engineering, modifications and documentation support. The unique combination of OEM (design) expertise and after-sales support services makes us an essential partner for the aerospace industry. We have a global presence, with facilities in Europe, Asia and the Americas.

### Working With Us

What is the height of your ambition? Ours starts at roughly 30,000 feet and climbs from there. Few people know what it feels like to set their work in the sky. Others may have a hard time relating but your colleagues understand that when your work takes flight, so do you. Which is why our team leaders are so driven to support the development of your maximum potential. Together, your work will mix renewal with innovation, reinvention and repair to create tailored solutions that soar. Your entrepreneurial spirit will be given the space to maneuver, working with a team that is as open, transparent and engaged as you are. With Fokker Services, every action you take has a meaningful impact on a clients' success. It's this total combination, and the strength of the relationships formed through a shared dedication, that keeps hardworking talent here for 20, 30 plus years. Time enough to reach the height of your ambition, and discover what lies beyond.

### The Role

This is an important role supporting the QA Manager to ensure the entire monitoring structure used to supervise the equipment, systems and internal processes are in compliance with Aviation Regulatory standard and meet Airworthiness requirement at every stage.

### The Team

QA maybe a small team within Singapore but it always has a global QA leverage across the Netherlands and the Americas.

### **Key Responsibilities**

- Perform internal audits; enhance internal processes through surveillance audits.
- Maintain and update Quality manuals, training records and ERP related manuals.
- Assist and perform external supplier audits.
- Assist in external airworthiness authority / customer audits.
- Follow-up with process owners to ensure prompt corrective actions are duly completed.
- Monitor open audit findings, including monitoring of corrective action plans.
- Conduct internal briefing / training for certifying staff and technicians as necessary.
- Assist in maintaining the approved suppliers list.
- Monitor and process Company Authorization's renewal and applications.
- Maintain quality documents (e.g. QA Manuals) and quality management system.

### **Experience, Qualifications and Attributes**

- Diploma in Engineering from an accredited polytechnic (or equivalent)
- Minimum 2-years' experience in Quality (Management) Systems or a Quality Assurance role in the Aerospace Industry
- ISO/AS internal auditor training / auditing experience is preferred
- Knowledge of aviation regulation such as Part 145 EASA, FAA, CASA
- Knowledge of and experience with aircraft / component (parts) maintenance
- Basic proficiency with PC tools and software e.g. Visio, Excel & Word
- Good analytical skills and the ability to work independently

### **What We Offer**

- Dental benefits
- Medical benefits
- Flexi-hours
