

Internship

Digital distribution of Operating and Maintenance Manuals

The organization

Fokker Services is an independent aviation 'service provider'. We offer tailor-made solutions to regional, commercial and military aircraft. This is how we supply aircraft parts, we offer availability programs for components, we do maintenance and modification programs. We strive to offer our customers only the best from engineering to customer service. At Fokker Services we have a clear focus, i.e. to keep aircraft there where they belong: in the air. Fokker Services employs more than 400 people in the Netherlands, the USA and Singapore.

The internship assignment – Digital distribution of Operating and Maintenance Manuals

At present, Operating and Maintenance Manuals for CASA-customers are delivered on DVD and in some cases on paper.

Fokker Services wants to digitize this as much as possible, so that the customer can download the data from the MyFokkerFleet portal.

This internship assignment consists of

- Researching what we can or cannot digitize and how we can shape this.
- researching how to make the documents downloadable in a controlled manner. File size 2 x DVDs.
- Make a Cost Benefit / Analysis: manhours, material, printing and shipping costs versus revenue from contracts

This should also reveal which work instructions need to be adjusted.

Location

Location of the internship is Fokker Services, location Hoeksteen 40, Hoofddorp.

Profile

The expected level of the trainee is preferably HBO with a technical course (e.g. logistics or IT). Be able to connect with several people to understand the current process.

Start of the internship: September 2021 with a duration of 3-4 months (depending on the internship duration)
