

## **Chief Engineer**

Are you an experienced Chief Engineer with a strong background and experience in the domain of aircraft design, certification, testing and execution of complex aircraft programs and projects? Then we have a great opportunity for you to support and join the Fokker Services Group.

As our Chief Engineer you will work on challenging projects and programs in the field of engineering, program management and relation management with our employees, customers, suppliers and airworthiness authorities. You will be part of a growing, diverse and innovative company and enjoy flexibility managing your work hours. The estimated hours to fulfill this position, based on knowledge and experience will be between 0.4 – 1.0 FTE, you will also receive a robust benefits package.

### **A week in the life of a Chief Engineer:**

- Provide technical expertise and direction to support the design, certification, testing and execution of complex modifications for commercial, private and defense aircraft;
- Provide expertise and leadership to the implementation of innovative technologies, products and services;
- Represent our company via presentations/panel discussions at relevant exhibitions, provide guest lectures at schools and universities and write articles for relevant media;
- Support our proposal-, sales- and project-teams with your knowledge and expertise in relation to proposal-management, risk-management and presentations at our customers in the various stages of proposal-, sales- and execution management;
- Proactively act as a coach for our employees to support them with technical issues, trade-off studies and bring them in connection with the right people and organizations within and outside our company. In addition, you will lead or support research assignment, interns- and graduate-studies;
- Keeping up to date with developments in the market;
- You will monitor and steer new initiatives to broaden our product portfolio and/or our capabilities;
- Evaluate and give advice on the required knowledge and capabilities for the engineering department.

### **What do we ask from you?**

- A Master's Degree in Aerospace Engineering engineering or equivalent by other scientific disciplines or relevant experience;
- Bringing fifteen years or more of relevant experience working as a Senior Engineer in aircraft design, certification and testing;
- You have built a strong network with the various players in the field of aircraft engineering;

- Excellent communication skills, organizational awareness and capable of being an intermediary between the various disciplines in our working arena;
- You have impact/influence on our organization and our stakeholders;
- Maintaining the “big picture” and conceptual integrity;
- Initiate and manage change;
- Being flexible about working hours and travelling abroad.

### **About Fokker Services Group**

At Fokker Services Group, our greatest purpose is to exceed reliability expectations, keeping customer aircraft where they belong - in the sky!

An aftermarket integrator with design, production, maintenance, and airworthiness expertise and experience, on which commercial and defense operators around the world rely for the continued competitive operation of their fleet. Unique independent competence for comprehensive single source solutions with a global presence, with facilities in Europe, Asia, and the Americas. The Fokker Services Group has a profitable revenue of Euro 250M and employs around 1000 people.

### **Our Values**

As a High-Performance Organization, our core values shine through in everything we do:

#### Customer Focus

We meet and exceed our customers’ expectations by offering unique and personalized solutions. Creating clear expectations and building a sustainable relationship based on quality, safety and trust is what we value most.

#### Innovative Thinking

Our success is based upon an innovative mindset. We identify and create new opportunities, products, and customer solutions by being brave, daring to lead and making decisions. With our entrepreneurial and growth mindset, we explore and learn ways of doing things differently every single day.

#### Global Excellence

We strive for quality, reliability, and excellence. Together we create a high-performance culture in which digital transformation, continuous learning and improvement is key. Sharing knowledge and working cross functionally helps us to inspire and achieve our shared goal; to exceed expectations and keep aircrafts where they belong; in the sky!

### We Care

Our people are at the heart of our organization. Only when we work together can we create an inclusive and respectful work environment in which we motivate, support, and inspire each other. We make a difference by being open, honest, respectful, and empathetic towards each other. Safety, quality, and trust are paramount.
