

Technician Power Generation (IDG)

About Fokker Services

At Fokker Services, our drive revolves around one purpose: exceed reliability expectations to keep aircraft where they belong, in the sky. As a Global Independent Aerospace Service Provider we create tailored solutions for maintenance of regional, commercial and military aircraft. We engineer, repair, upgrade, and deliver high-quality solutions, innovating in multiple areas to facilitate and support competitive operations for airlines. Our services range from type certificate holder-related product support services to flight hour based component availability and repair programs, spare parts, engineering, modifications and documentation support. The unique combination of OEM (design) expertise and after-sales support services makes us an essential partner for the aerospace industry. We have a global presence, with facilities in Europe, Asia and the Americas.

Working With Us

What is the height of your ambition? Ours starts at roughly 30,000 feet and climbs from there. Few people know what it feels like to set their work in the sky. Others may have a hard time relating but your colleagues understand that when your work takes flight, so do you. Which is why our team leaders are so driven to support the development of your maximum potential. Together, your work will mix renewal with innovation, reinvention and repair to create tailored solutions that soar. Your entrepreneurial spirit will be given the space to manoeuvre, working with a team that is as open, transparent and engaged as you are. With Fokker Services, every action you take has a meaningful impact on a clients' success. It's this total combination, and the strength of the relationships formed through a shared dedication, that keeps hardworking talent here for 20, 30 plus years. Time enough to reach the height of your ambition, and discover what lies beyond.

The Role

You play a key role in the repair, revision and modification of AC and DC power generating systems components at our Schiphol facility. Fokker components to components of other aircraft platforms (e.g. A320/B737/B777). In this position, you will have the opportunity to obtain the skills to test the power generating components (Tester) and grow into the position of Certifying Staff.

The Team

You will be part of team in the Power generating shop, which is located at Fokker business park Oude Meer in The Netherlands. This team now exists out of 10 highly motivated and skilled mechanics. We are expanding, and seek talented people that will reinforce the department.

Key Responsibilities

- Inspect, troubleshoot and repair power generating components, both mechanical and electrical repairs;
- Testing of repaired power generating components;
- Continuously look for improvement opportunities that are in line with your work and/or environment;
- Working according and familiar with aviation regulations described in EASA and MOE
- Occasionally Lapping (polishing) and Honing of aircraft component parts.
- Play an essential role in supporting repair and overhaul critical components on non-Fokker aircraft platforms;
