Cost
Control

Launched in 1992 by Fokker Services, ABACUS is one of the longest-running Component Availability and Maintenance services in regional aviation history. It supports over 250 aircraft and serves operators of Fokker 50, 60, 70, 100, Dash 8 Classic, and CRJ 700, 900, 1000 aircraft.

The ABACUS program combines repair management and availability with sophisticated reliability monitoring and on-site stock service that is fully tailored to meet your specific support requirements. With extensive pool stocks and repair capabilities on four continents, ABACUS is the reliable, long-term partner you need to secure a profitable aircraft operation.

Key Program Objectives

ABACUS is a flexible mix of solutions and services based on three core pillars:

Guaranteed Component Availability

Minimize downtime with full and unlimited access to serviceable components in the correct configuration, direct from AOG stock on-site or from one of the regional exchange pools at our 24/7 regional support centers.

Predictable and Competitive Costs

Removed components are maintained in our repair shops or by our experienced business partners with the most cost-effective, high-quality standards. Your costs are predictable and therefore aligned to your budgets.

Reliability Control and Improvements

Results in a longer on-wing time, and reduces operational risk as well as line maintenance costs.

Fokker Services

At Fokker Services, our drive revolves around one purpose: exceed reliability expectations to keep your aircraft where they belong, in the sky. As a Global Independent Aerospace Service Provider we create tailored solutions for your maintenance of regional, commercial and military aircraft. We engineer, repair, upgrade, and deliver made-to-measure solutions, innovating in multiple areas to facilitate and support your competitive operations. Our services range from type certificate holder-related product support services to flight hour based component availability and repair programs, spare parts, engineering, modifications and documentation support. The unique combination of OEM (design) expertise and after-sales support services makes us an essential partner for the aerospace industry. We have a global presence, with facilities in Europe, Asia and the Americas.
