

IT Security Manager & Architect

Fokker Services and Fokker Techniek are internationally operating companies (around 700 employees) with offices in the Netherlands and abroad (USA, Asia). We are specialized in logistics and technical services in the field of repair, maintenance and modification of aircraft.

Fokker Services and Fokker Techniek are unique and valuable partners for the global aerospace industry, supporting a large fleet of various aircraft types.

Our capabilities include Component Availability Programs, Flight hour based Component Repairs, Engineering and Documentation Support and Airframe Maintenance, Modifications, Conversion, Completion capabilities as well as OEM Partnering and Support Services.

To support our primary business processes the ICT department has an open vacancy for an IT Security Manager & Architect.

The position

As an IT Security manager & Architect you will be:

- Designing, building, testing and implementing security systems within the organisation's IT network;
- monitoring the IT environment and ensuring adequate controls are implemented and sustained;
- administrating and supporting security programs & procedures.

You will troubleshoot all security matters. From detecting security issues and susceptibility, to inspecting security risks and constructing.

Your responsibilities

- Plan, research and design durable security architecture for various IT projects and services;
- research, review and when necessary implement the latest IT security standards, systems and best practices;
- asses new technologies and industry trends, support teams with the implementation, ensuring effective controls are in place;
- document and review/amend procedures; secure procedures are current and accessible to authorized personnel/organizations;
- accompany audits and ensure audit records are collected, reviewed and documented and when necessary shared with authorized (audit) organizations.

Your profile

You have a thorough understanding of complex IT systems and stay up to date with the latest security standards, systems and authentication protocols, as well as best practice security products.

Additional to that we are looking for someone who has:

- A solid understanding of security protocols, cryptography, authentication, authorization and security;
- extensive experience in information security and/or IT risk management with a focus on security, performance and reliability;
- the ability to design secure system architectures through the application of patterns and principles, to meet user needs whilst managing risks. You are also able to identify security issues in system architectures;

- knowledge of system architectures. You are able to understand the risk impact of vulnerabilities on existing and future designs and systems, and identify how easy or difficult it will be to exploit these vulnerabilities.

Location

This position is based in Hoofddorp. Travel to our sites in Hoogerheide, Singapore and LaGrange can be required as well. Of course, we will be working from home as long as the government advises us to.

What do we offer?

The CAO Metalelektro applies. This consists out of the following:

- A competitive salary;
- when working fulltime (40 hours), you have 40 days of leave (holiday days and ADV days) per year;
- career opportunities;
- a lot of professional, personal growth and freedom.

How to apply?

This position is open internally and externally. You can send your cover letter and resume at the latest May 23 2021, to Arend Teters, IT Manager, arend.teters@fokker.com.
