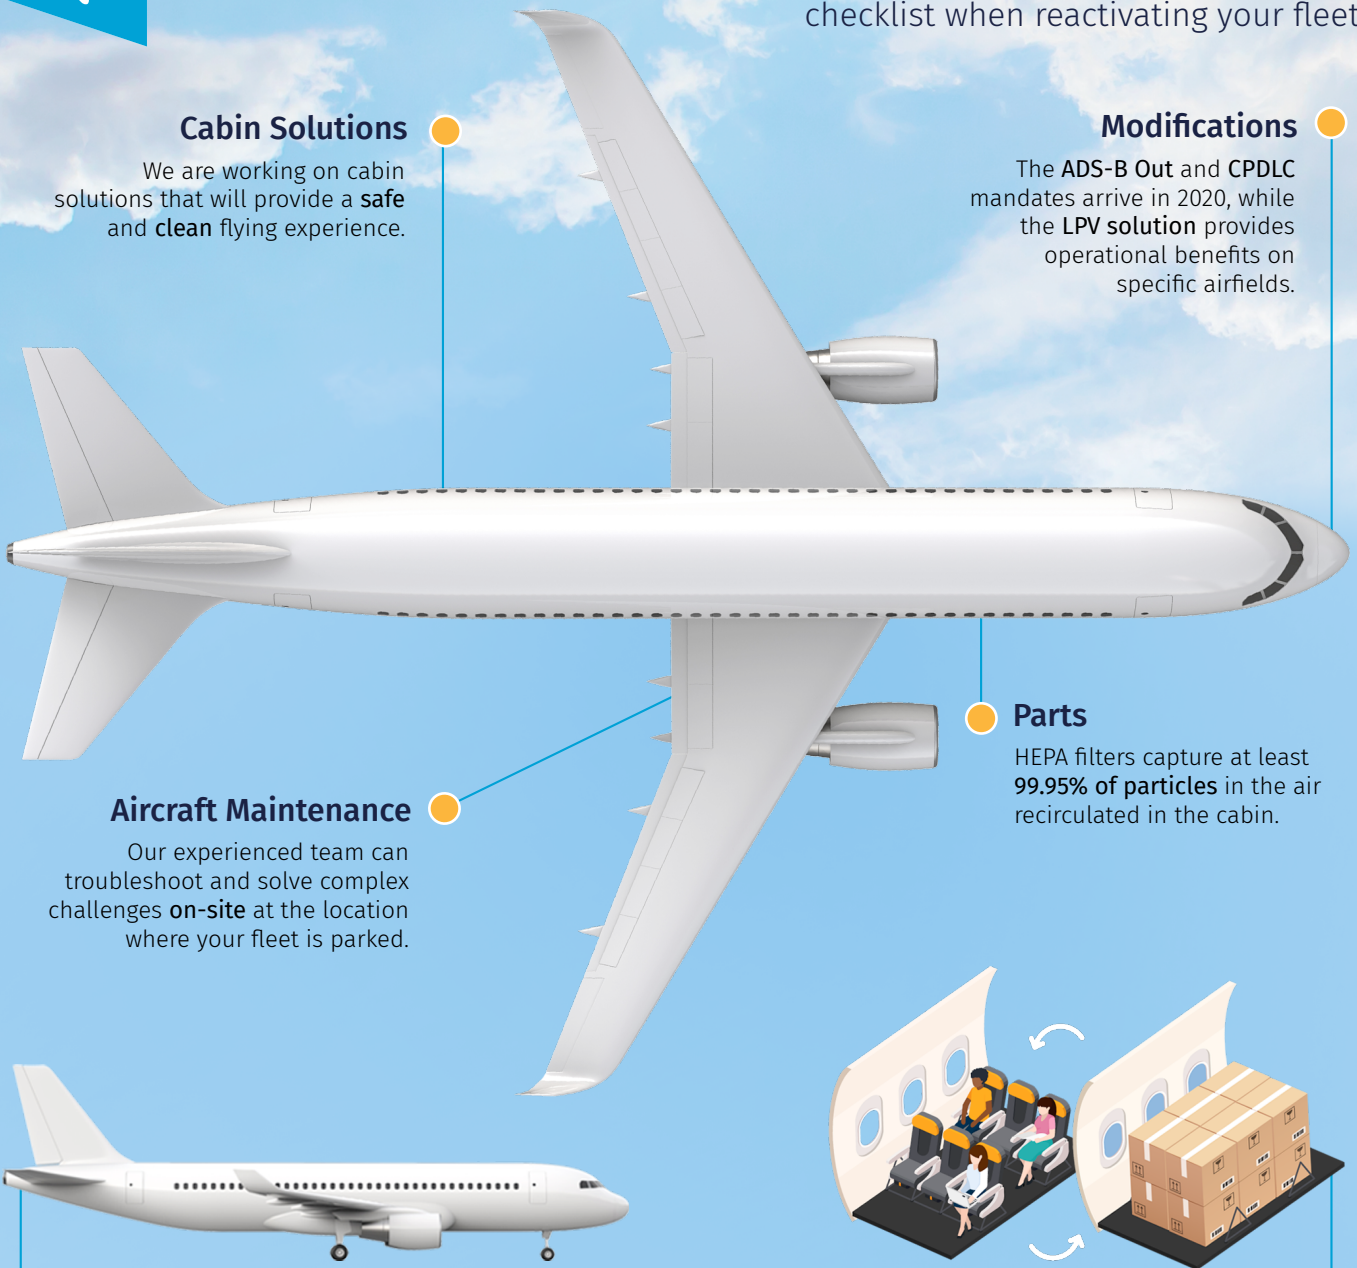
Fokker Services

Back in the Sky

Don't forget to keep these points on your checklist when reactivating your fleet



Cabin Solutions

We are working on cabin solutions that will provide a **safe** and **clean** flying experience.

Modifications

The **ADS-B Out** and **CPDLC** mandates arrive in 2020, while the **LPV solution** provides operational benefits on specific airfields.

Parts

HEPA filters capture at least **99.95% of particles** in the air recirculated in the cabin.

Aircraft Maintenance

Our experienced team can troubleshoot and solve complex challenges **on-site** at the location where your fleet is parked.

Parking Program

Check the unique specifications for your aircraft **OEM Parking Program** procedure. If you run into challenges, we can be your partner as a parts supplier with AOG logistics support.

Aircraft Conversion

Our reversible pax-to-cargo conversion follows **EASA-issued guidelines**. Available for Fokker aircraft and more.

Component MRO

From replacing battery packs to ensuring engine bleed air valves are running as they should, we provide MRO services for these components and everything in between.
